PROFILE

Senior software test engineer with over fifteen years in finance, insurance, retail, gaming, gambling and estate agency, across permanent, contract and consulting roles. Certified tester (ISTQB Foundation and Intermediate) and business analyst (BCS FCBA). Comfortable with Agile and Waterfall, Scrum and Kanban, and with explaining testing to people who aren't testers, which is why I wrote a book about it.

AUTHOR

The Book On Software Testing: A Guide for Non-Testers (hardcover, December 2025). A jargon-free guide for Product Owners, Project Managers, Business Analysts and developers who work with testers.
